

EPP Design Party

English Paper-Piecing Workshop with Tina Craig

Learn the basics of English Paper Piecing, but go home with a project that is uniquely yours. We'll be working with shapes based on 60° angles: hexagons, diamonds, jewels, triangles and more. This is the fun side of geometry! Enjoy fussy cutting with Tina's EPP tool, The Wonder Window. Suitable for beginners, this class will also engage experienced hand stitchers.

Supplies

Fabric: assorted scraps, charm squares, fat eighths or fat quarters. Consider starting with a favorite print as a guide for choosing coordinating colors. Bring at least 4 coordinating fabrics. See page 2 for suggestions.

Additional fabric and batting will be needed after class to complete your project.

Fabric glue pen and refills, any brand.

Needles: Straw or Milliner size 9, 10 or 11.

Thin thread such as Superior Bottom Line (60 wt poly) or Wonderfil DecoBob in a neutral color.

Fabric scissors.

Tape: paper tape or masking tape, optional.

Thimble that works for you.

\$10 materials fee covers paper templates and handouts.

EPP tool kits (similar to the one shown below), as well as individual items, will be available for purchase from Tina. Please note that tool kits do not include fabric. Items may vary based on availability.

Fabric Options

Almost any medium-scale print will produce lovely fussy-cut shapes. Here are some examples of jewel shapes made into hearts. Look for motifs that are approximately 1.5 -2" long. Stripes and symmetrical motifs are especially fun to work with.

This Jane Sassaman print does it all!
Repeating motifs, Symmetry, Mirror Image
and Pattern Matching of the large flower.
